

RAMÓN VERDUGO. Structural Engineer from Pontificia Universidad Católica de Chile (1983), Master and Ph.D. from University of Tokyo, Japan (1999 and 1992), and Post-Doctoral research at the Norwegian Geotechnical Institute (1996). He served as Head of the Geotechnical and Pavement Area at the Institute for research and testing materials (IDIEM) of University of Chile. He has been academic at University of Santiago, La Serena, Federico Santa María, Pontificia Universidad Católica and Universidad de Chile. Consultant and specialist with more than 30 years of experience in analysis of singular problems in geotechnical engineering, soil dynamics and seismic stability of earth and tailings dams. Founder partner of CMGI Ltda. and Past-President of the Chilean Geotechnical Society. Some of his publications are the following:

Verdugo, R. and Gonzalez, J. (2015): "Liquefaction-induced ground damages during the 2010 Chile Earthquake," *Soil Dynamics and Earthquake Engineering*. Volume 79, December, pp. 280-295.

Verdugo R., Sitar N., Frost J., Bray J., Candia G., Eldridge T., Hashash Y., Olson, S. and Urzua A. (2012): "Seismic Performance of Earth Structures during the February 2010 Maule, Chile, Earthquake: Dams, Levees, Tailings Dams, and Retaining Walls," *Earthquake Spectra*. Volume 28, June, Issue S1.

Verdugo, R. (2009): "Seismic performance based-design of large earth and tailings dams", KEYNOTE LECTURE. International Conference on Performance-Based Design in Earthquake Geotechnical Engineering – from case history to practice. Tsukuba, Japan. June 2009.

Verdugo, R. (2009): "Amplification phenomena observed in downhole array records generated on a subductive environment," *Physics of the Earth and Planetary Interiors*. Vol. 175, June.

Verdugo, R. and Peters, G. (2009): "Observed seismic behavior of three Chilean large dams," Earthquake Geotechnical Case Histories for Performance-Based Design. Editor: Takaji Kokusho

Verdugo, R. (2008): "Singularities of geotechnical properties of complex soils in seismic regions", *J. of Geotechnical and Geoenvironmental Eng.*, ASCE, Vol. 134, No. 7, pp. 982-991.

Verdugo, R. and Ishihara, K. (1996): "The Steady State of Sandy Soils," *Soils and Foundations*. Vol. 36, No. 2, pp. 81-91.
